

```
let taskStack = [];

function addTask() {
    const taskName = document.getElementById('taskName').value;

    taskStack.push(taskName);
    updateProcessLine();
    document.getElementById('taskName').value = '';
}

function undoTask() {
    if (taskStack.length === 0) {
        alert('No tasks to undo!');
        return;
    }

    taskStack.pop();
    updateProcessLine();
}

function updateProcessLine() {
    document.getElementById('process-list').textContent = taskStack.join(', ');
}
```
